Office Action	1 Summary

U.S. Patent and Trademark Office PTO-326 (Nov. 11/0)

 The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

## Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and IMPEP 608.05. Computer program listings (37 CFR 1.58(e)), "Sequence Listings" (37 CFR 1.821(e)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
- REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

  "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

  (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
  (h) DETAILED DESCRIPTION OF THE INVENTION
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
  (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A
  - "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2.

## Content of Specification

(a) <u>Title of the Invention</u>: See 37 CFR 1.72(a) and MPEP § 606. The title of the invention should be placed at the top of the first page of the specification unless the title is provided in an application data shet. The title of the invention should be brief but technically accurate and descriptive, preferably from two to seven words may not contain more than 500 characters

- (b) <u>Cross-References to Related Applications</u>: See 37 CFR 1.78 and MPEP § 201.11.
- (c) Statement Regarding Federally Sponsored Research and Development: See MPEP \$ 310.
- (d) Incorporation-By-Reference Of Material Submitted On a Compact Disc. The specification is required to include an incorporation-by-reference of electronic documents that are to become part of the permanent United States Patent and Trademark Office records in the file of a patent application. See 37 CFR 1.52(e) and MPEP \$608.05. Computer program isitings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text were permitted as electronic documents on compact discs bedinning on Sectember 8.2000

Or alternatively, <u>Reference to a "Microfiche Appendix"</u>: See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.

- Background of the Invention: See MPEP § 608.01(c). The specification should set forth the Background of the Invention in two parts;
  - (1) Field of the Invention: A statement of the field of art to which the invention pertains. This statement may include a paraphrasing of the applicable U.S. patent classification definitions of the subject matter of the claimed invention. This item may also be titled "Technical Field."
  - (2) Description of the Related Art including information disclosed under 37 CFR 1,97 and 37 CFR 1,98 A description of the related at known to the applicant and including, if applicable, references to specific related art and problems involved in the prior art which are solved by the applicant's invention. This item may also be titled "Background Art."
- (f) <u>Brief Summary of the Invention</u>: See MPEP § 608.01(d). A brief summary or general statement of the invention as set forth in 3 CFR 1.73. The summary is separate and distinct from the abstract and is directed toward the invention rather than the disclosure as a whole. The summary may point out the advantages of the invention or how it slowes problems

. .

- previously existent in the prior art (and preferably indicated in the Background of the Invention). In chemical cases it should point out in general terms the utility of the invention. If possible, the nature and gist of the invention or the inventive concept should be set forth. Objects of the invention should be treated briefly and only to the extent that they contribute to an understanding of the invention.
- (g) Brief Description of the Several Views of the Drawing(s): See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74
- (h) <u>Detailed Description of the Invention</u>: See MPEP\$ \$08.01(g). A description of the preferred embodiment(s) of the invention as required in 37 CFR 1.71. The description should be as short and specific as is necessary to describe the invention adequately and accurately. Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention described and their exact nature or type is not necessary for an understanding and use of the invention by a person skilled in the art, they should not be described in detail. However, where particularly compounds, or processes may not over owner the elements win in the field, the specification should refer to another patent or readily available publication which adequately describes the subiect matter.
- (i) Claim or Claims See 37 CFR 1.75 and MPEP § 608.01(m). The claim or claims must commence on separate sheet or electronic page (37 CFR 1.52(b)(3)). Where a claim sets forth a plurality of elements or steps, each element or step of the claim should be separated by a line indentation. There may be plural indentations to further segregate subcombinations or related stops. See 37 CFR 175 and MPEP e 568.01(n)-(n).
- (i) Asstract of the Disclosure: See MPEP § 608 01(f), A brief narrative of the disclosure as a whole in a single paragraph of 150 words or less commencing on a separate sheet following the claims. In an international application which has entered the national stage (37 CPR.146(f)b), the applicant need not submit an abstract commencing on a separate sheet if an abstract was published with the international application under PCT Article 21. The abstract that appears on the cover page of the pamphlet published by the international Bureau (IB) or the World Intelled Property Organization (WIPO) is the abstract that will be used by the USPTO. See MPEP § 1980.30(e).
- (k) <u>Sequence Listing</u>, See 37 CFR 1.821-1.825 and MPEP §§ 2421-2431. The requirement for a sequence listing applies to all sequences disclosed

in a given application, whether the sequences are claimed or not. See MPEP \$ 2421.02.

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set furth the best mode contemplated by the inventor of carrying out his inventions.
- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
- 5. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There are no examples of the type of meat, fruit, nuts and seeds that applicant uses in his inventions. Thus, it is not known how to make applicant's product. Corrections are required without new matter.
- Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are indefinite since it is not clear if applicant's claims are process claims or composition claims. Process claims require recitation of positive method steps. Composition claims require recitation of each component of the composition in positive form. Corrections are required without new matter.

 The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action: Application/Control Number: 09/902,860 Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set north in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at lare such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 8. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Christensen et al (Abstract; column 12, lines 29-33; column 24, lines 10-29 and column 25, lines 5-10) in view of Uozumi. Christensen et al disclose a ground meat product including fruits and seeds as dietary fiber. Smoke is also present (column 24, line 29). It would have been obvious to include nuts in the meat product of Christensen et al since ground meat products have been prepared with nuts and fruit, as taught by Uozumi. Additionally, new recipes for food compositions of which involve addition of common ingredents do not amount to invention merely because it is not disclosed that no one else ever did what applicant did. Applicant must establish a cooperative relationship between ingredients which produces a new, unexpected and useful function (In re Levin. 44 USPQ 232).
- Any inquiry concerning this communication from the examiner should be directed
  to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can
  generally be reached on Tuesday.--Friday from 10 a.m. to 7:30 p.m. and on alternate
  Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application is assigned is (571) 273-1399. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-0987.
